- ✓ REDUCE FRUSTRATION
- ✓ IMPROVE SAFETY
- ✓ AUSTRALIAN MADE
- ✓ REMOTE TECHNOLOGY
- ✓ SUPA-SLIP HOSE
- ✓ HEAVY DUTY
- ✓ CUSTOMER CARE

PRODUCT OVERVIEW

Welcome to the most compact, versatile sprayer from Quik Spray. Perfect for UTV's or side-by-side farm vehicles, the L-shaped tank provides easy access to the reels at arm height and assists in reducing tank surge when travelling. If space is a factor, our compact design is ideal for smaller vehicles, with plenty of room to spare!

Available as a single or twin reel system, the QR400 is independently powered by a tough 6.5HP Honda motor and comes ready to spray!

Ideal for agricultural spot-spraying, it comes complete with remote controlled reel retraction, so you'll double your spraying efforts. The 12-volt motor is powerful enough to retract up to 100m of Supa-Slip® hose, at the push of a button.

Easy to load and remove when you are finished your spraying tasks. The QR400 is the most compact footprint in the whole Quik Spray range!

QR400
TWIN REEL SPRAY UNIT

FEATURES

SPRAY IN HARD-TO-REACH AREAS

With the option to fit the QR400 on a side-by-side or dual cab ute, the QR400 will eradicate weeds in the most difficult-to-reach terrain

COMPACT & VERSATILE

Ideal for spot spraying, water transfer, and machinery wash down. Will also fit between the wheel arches of a dual-cab ute.

EASY-TO-USE HOSE REELS

The Easy-Walk Spool System is the latest in advanced hose reel management, making handling a breeze when walking out long lengths of hose.

DURABLE & ROBUST CONSTRUCTION

The tough UV-stabilised poly tank ensures reliable, long-lasting performance.

WHY CHOOSE US?

QUIK SPRAY® INVENTED THE REMOTE CONTROL RETRACTABLE HOSE REEL OVER 30 YEARS AGO.

We guarantee optimum performance and reliability of our spray units through continuous improvement and 30 years' experience serving the agricultural industry.

HONDA MOTORS - GREEN & GOLD APPROVED

There isn't a better name for small engines than Honda. That's why we've partnered with Honda for over 30 years to specifically match our machines with the best motors in the business. The Honda motors pack a punch, and are designed to work hard from day one, so we've made sure it's the right Honda engine for each Quik Spray model.

BERTOLINI PUMPS

20 years of partnership with Bertolini Pumps has allowed us to use of the highest quality pumps on the market. This guarantees optimum performance from your spray unit, first time, every time.

HEAVY DUTY COMPONENTS

When it comes to quality, we don't cut corners. Our equipment is all Australian made, right here in Warana, QLD. The framework is designed to withstand harsh treatment for heavy duty spraying applications in the roughest, hottest, driest locations on earth. The heavy-duty pressed steel reels have rounded edges for a bullet-proof and operator-friendly design.

SUPA-SLIP® HOSE

Quik Spray Supa-Slip® hose is a high-grade Nylon, which is a polyamide bio plastic derived from vegetable oil, offering advanced performance and strength, as opposed to lower grade Nylons commonly used. The Nylon 11 hose is UV and chemical resistant and highly resistant to abrasion. The light-weight Supa-Slip® hose, used only on Quik Spray systems, allows the hose to glide easily around trees, rocks, posts - in fact, any obstacle- without it catching or kinking.

RADIO REMOTE TECHNOLOGY

Our Quik Spray units are radio controlled by a hand-held transmitter. Our advanced radio technology gives you superior, independent radio range, without interference between operators. Over 30 years in the business means we have weeded out the inferior technologies used by others. Beware of out-dated technology. Comes with 5-year full comprehensive warranty on the RCM module (radio transmitters and radio control box).

CUSTOMER CARE

Exceptional products and customer service, is what we do at Quik Spray. We involve our best people each step of the way. With a dedicated warehouse and service centre, everything you need is only a phone call away. With over 30 years' experience we provide full technical customer service support when you need it.
